Our Logo

Our logo is basically a typographic idea of a premier event that focuses on the Electronics, Lightning, Power, Energy, and Allied Industries.

The letters are divided in a fixed zone with different contrast typography. And To be used on official documents, reports, stationery, main website.

Dos and Don'ts

The logo and its elements must always be used in its original format. Only supplied logo should be used in every brand communication. Stretching, rotating, altering and using the logo in different colors should be strictly avoided.

Do not scale unproportionally

Do not Add unapproved patterns

Do not rotate the logo

Do not use any solid color to support the logo

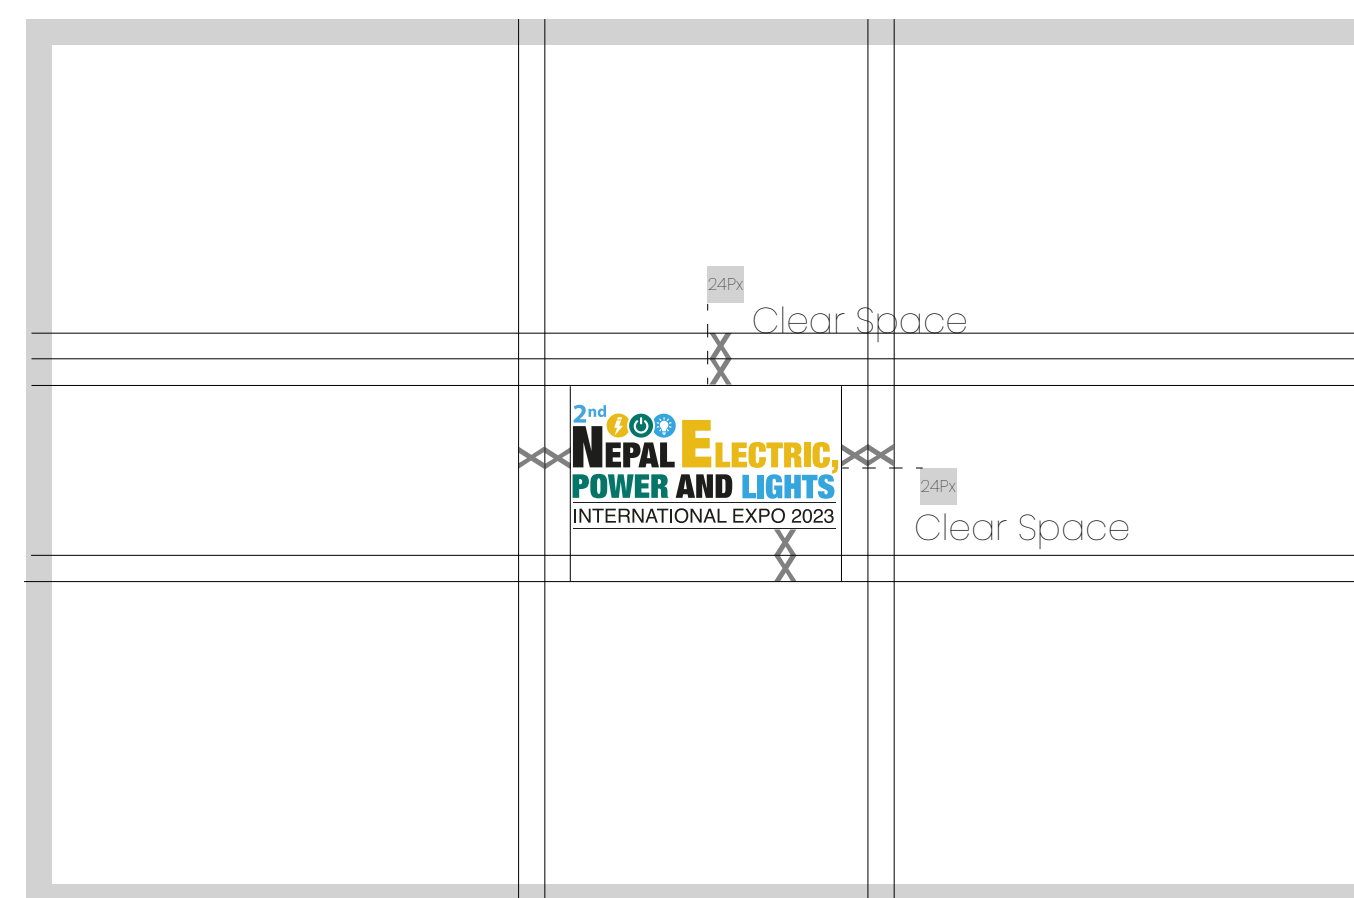

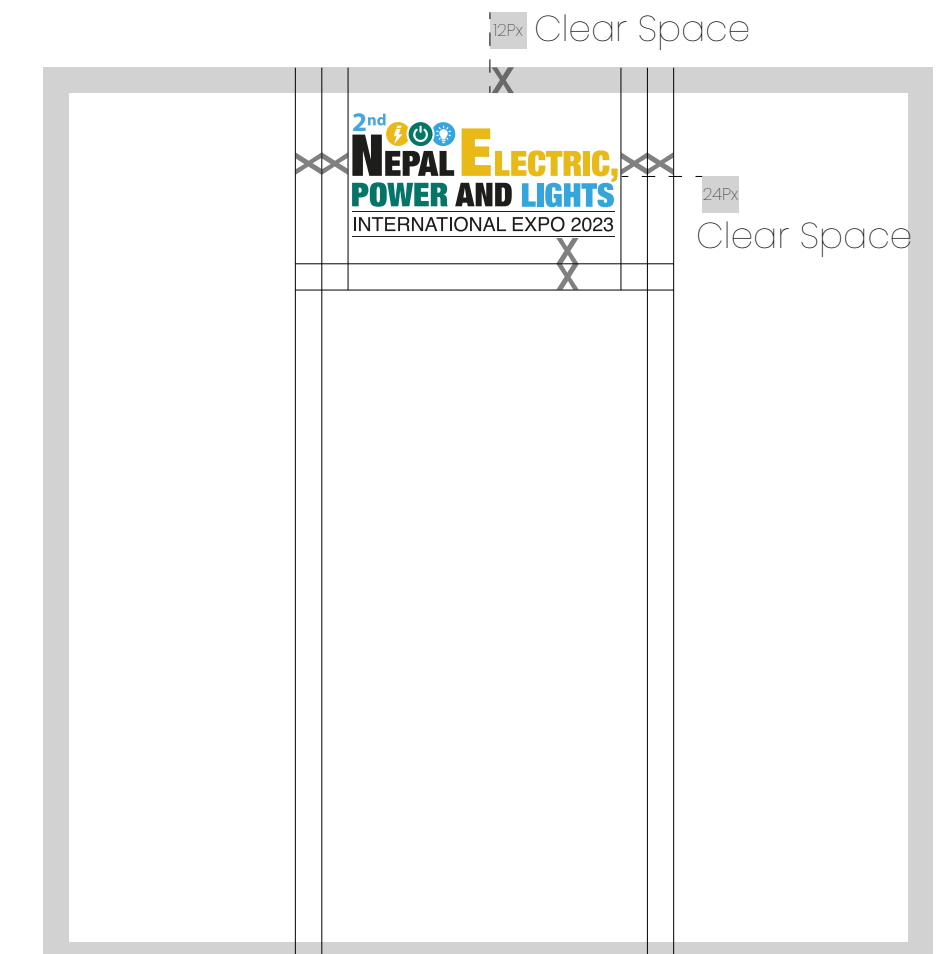

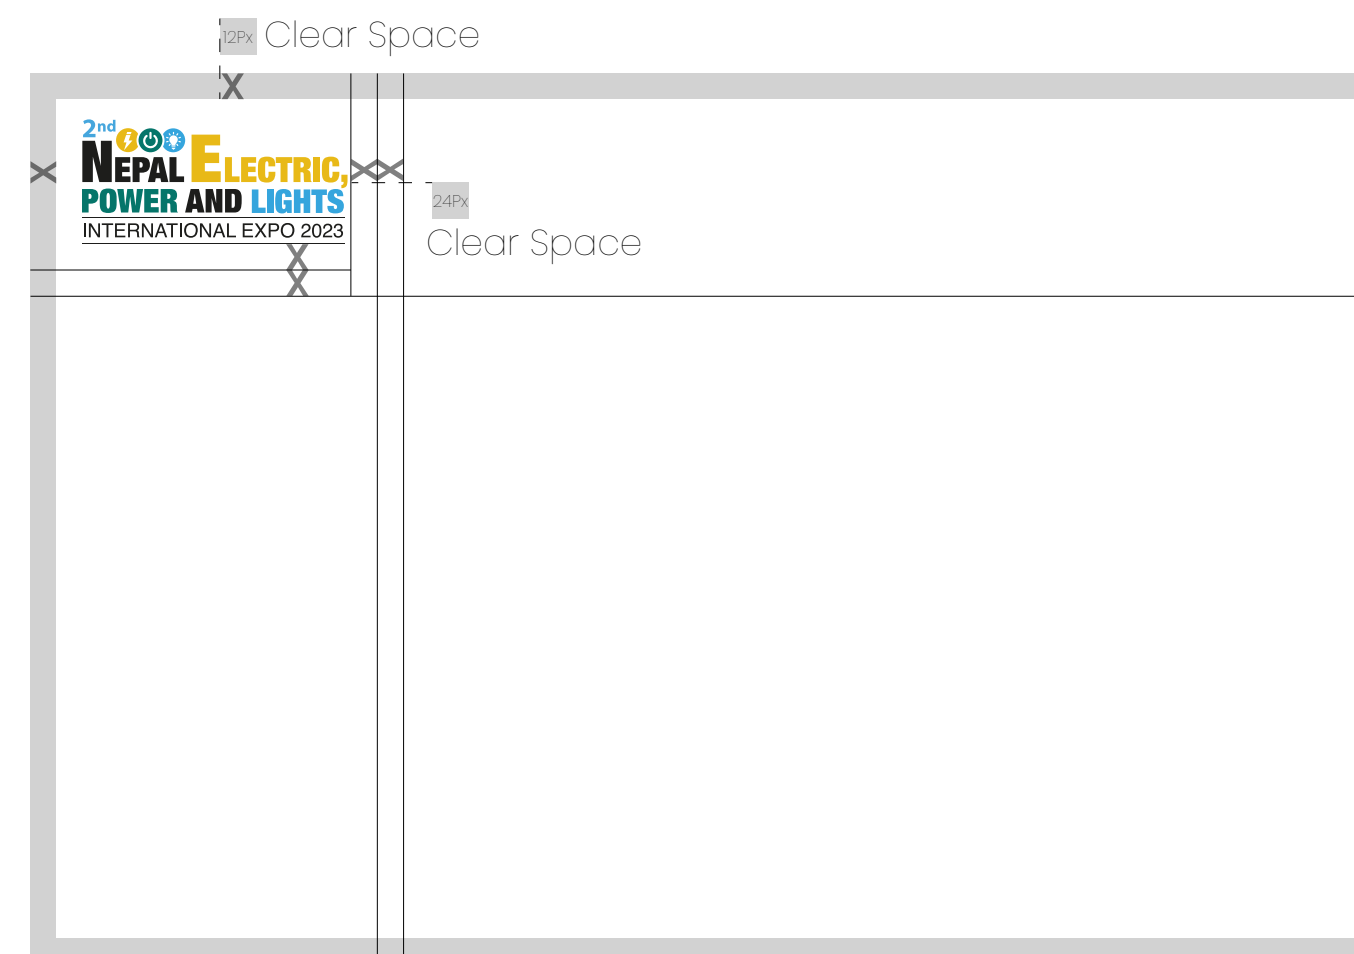

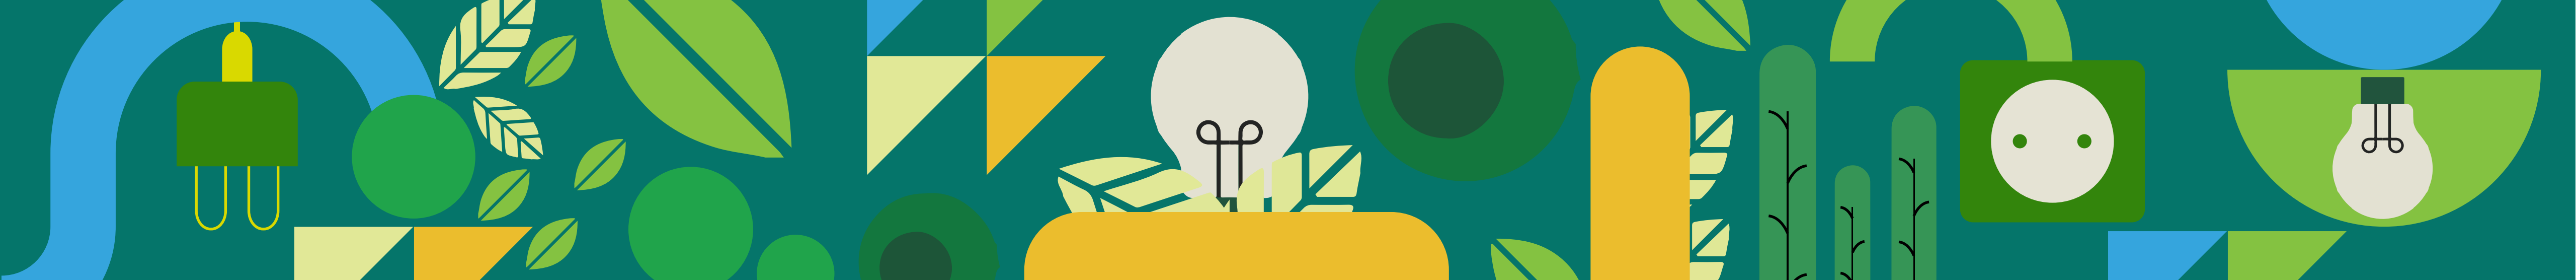

Do not use drop shadows

Logotype placement in digital communication & Ads

The logotype must appear on the right for all banners and digital communication. with an equal distance from two edges in space constrained.

Where the clear space has to be followed strictly. In Digital Communication logo will appear for 2-3 Sec in the last frame.

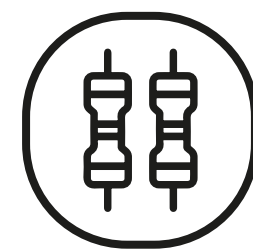

Jointly Organised By

Our organizers

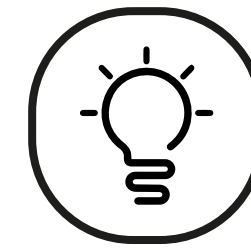

When the organizers has a horizontal logo, we have the options to use it in horizontal. We have clearly marked the dimensions to use the organizers logo. It should be different for both – the ones with the logomark logos and the ones without it. The user is requested to adhere to the organizers logo guidelines.

Icons to communicate

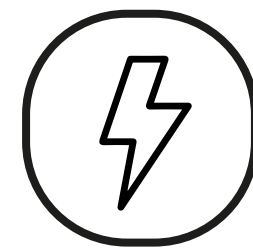

Icons are simplified graphic representations used to quickly communicate an idea, action or object. They can be found in interfaces, signage, branding and wayfinding systems, and help to improve communication and recognition.

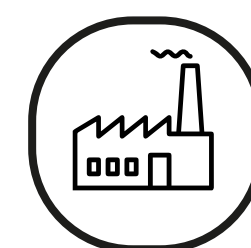

Electronic

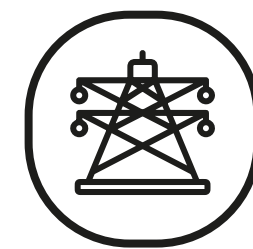

Lightning

Energy

Industry

Power

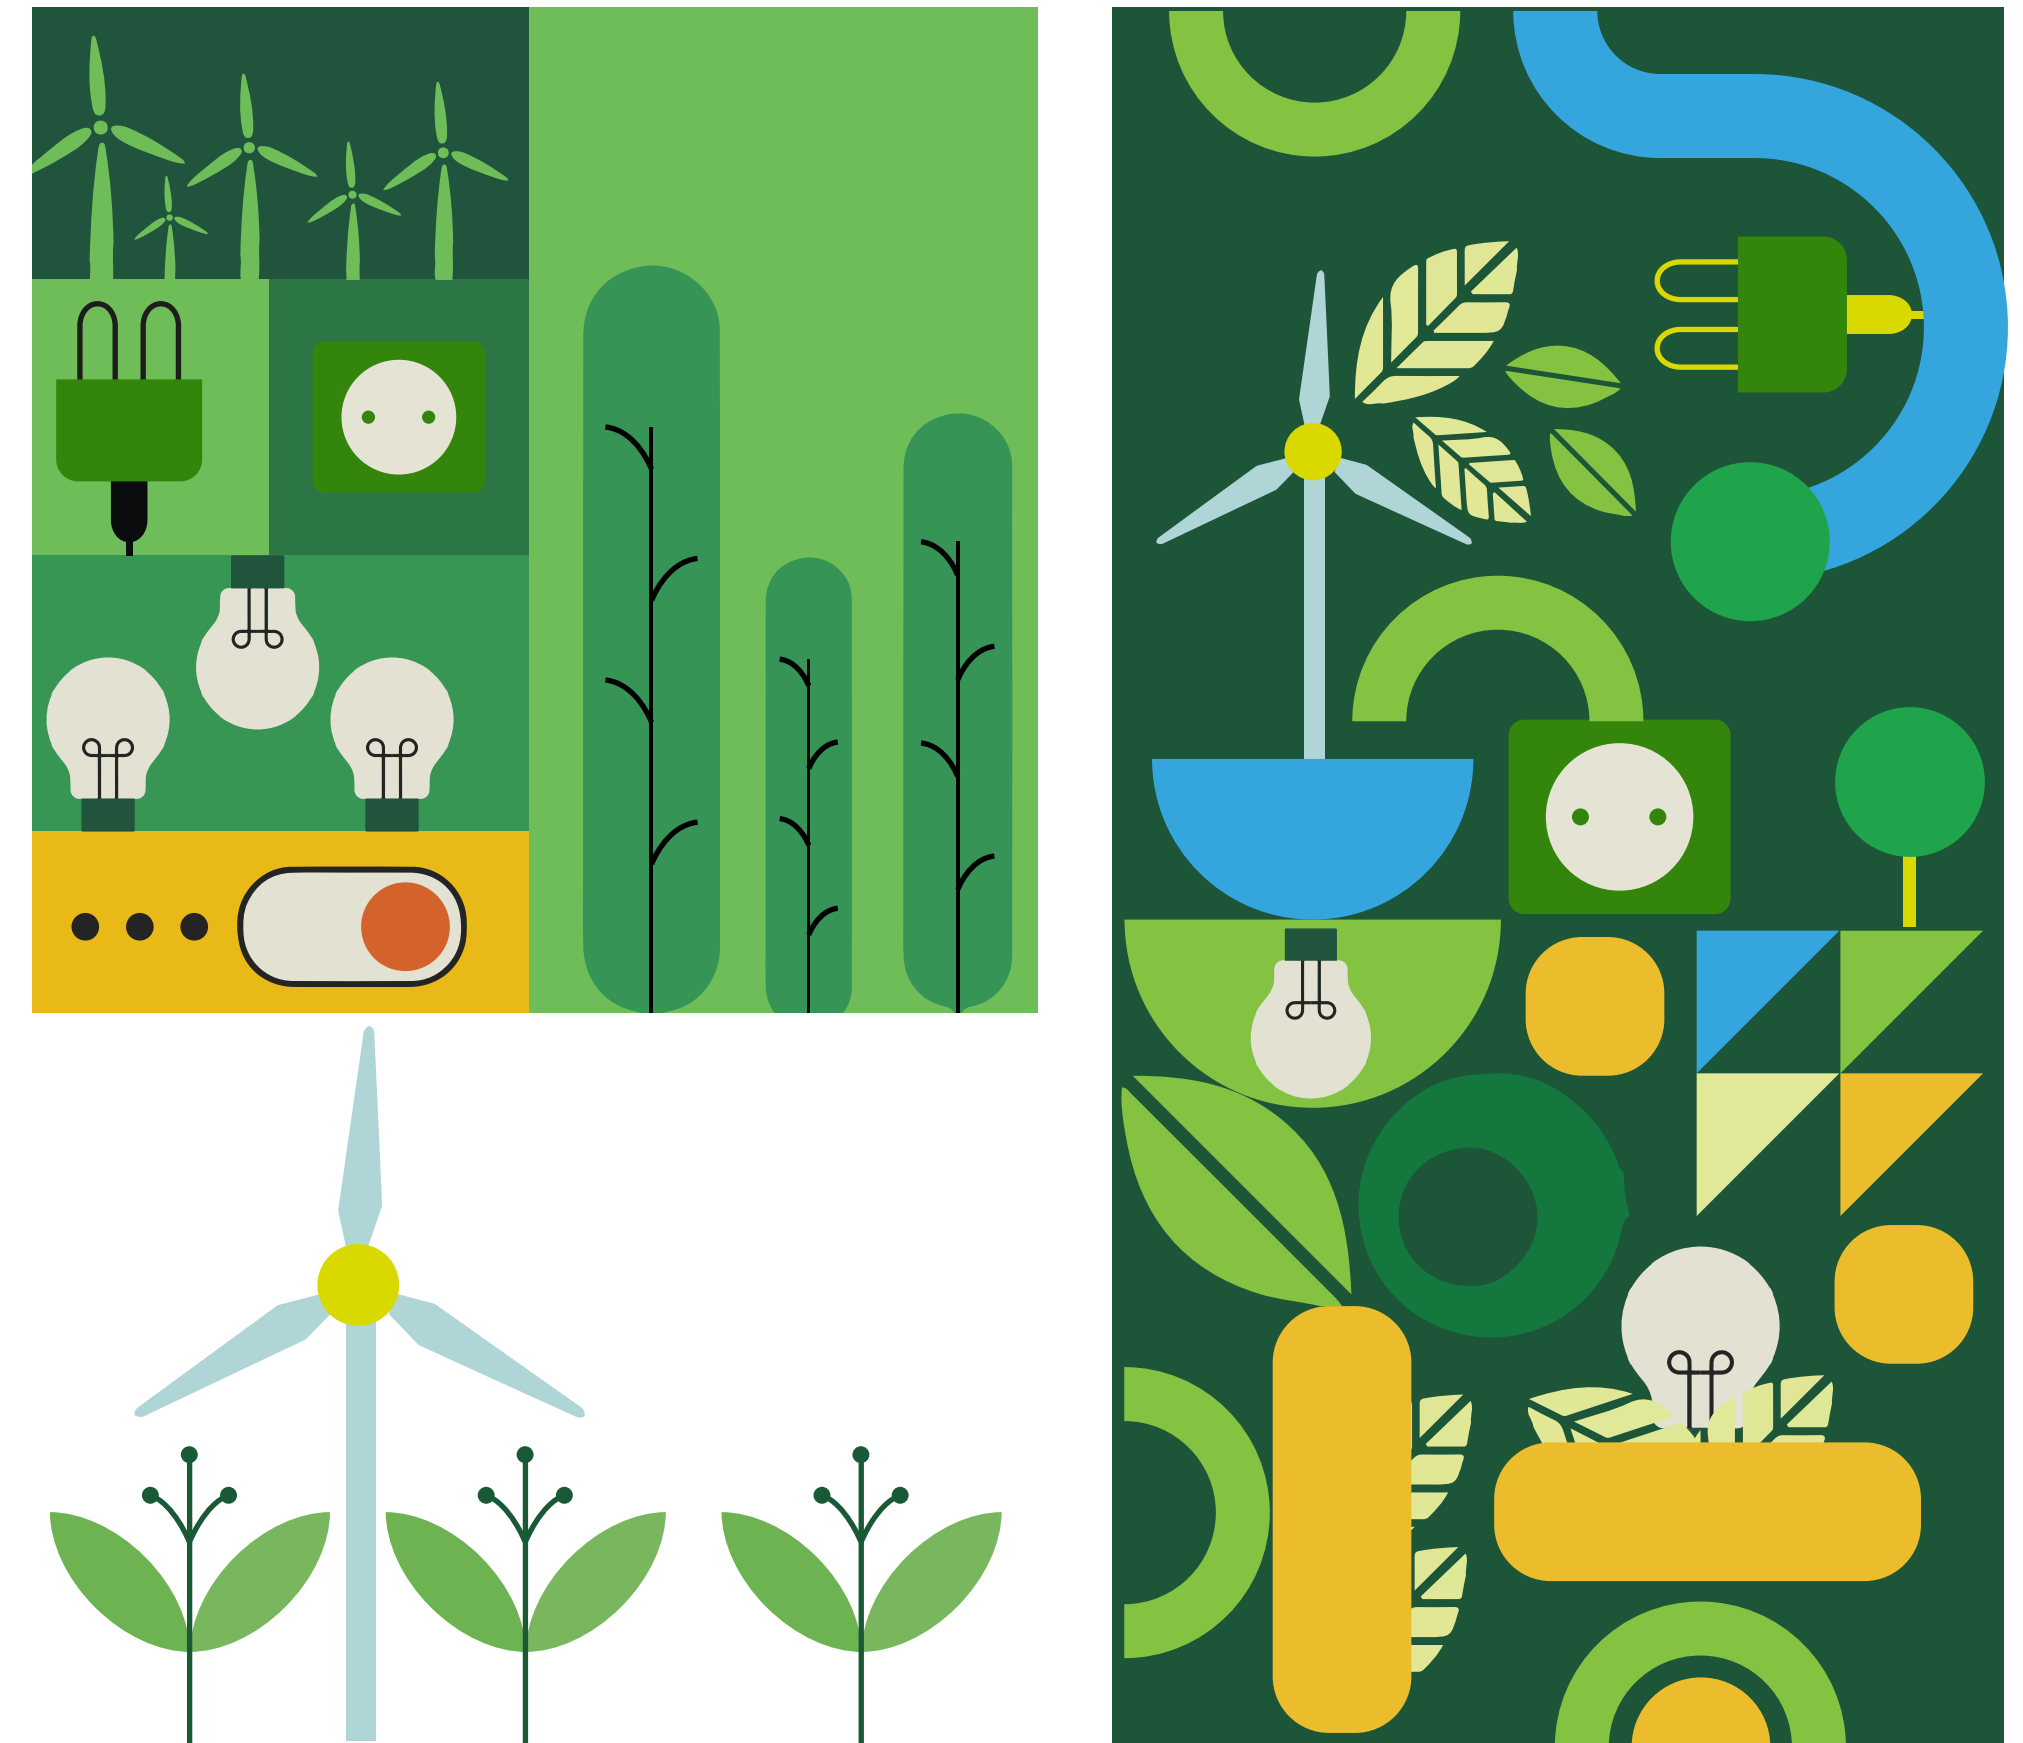

Tone of Voice

Our voice to people should be formal and friendly. it should be confident, positive and bold to convey the message in a conversational way.

We should be humble and polite in our language, tone, and personality. There will be teams speaking different languages. Our communication should be simple and lucid to the masses.

We need to slew from the given color palette, Patterns and font style, as it gives standardization and uniformity as a brand.

Images/videos for Online Content

Images and videos play a vital role in boosting the content. The use of images and videos can be tricky and legally harmful, if proper guidelines are not followed. Use of image in blog post, social media post, webpage, ebook, or any other piece of content improves the overall user experience.

Every image, which is available on Google, social media or on a stock photo site are protected by copyrights as soon as it is created, and the consequences of violating copyright are serious. Therefore, we should be aware about the do's and don'ts, when using images and videos.

Here are some of the best ways to find the right image for any online content.

Public Domain Images ('No Copyright' Images)

Public Domain images have no copyright because:

- The copyright has expired.
- The work never had copyright to begin with.
- The copyright holder released the work into the public domain.
- Copyright-free images will have the Public Domain Mark 1.0 or the CC0 1.0

Universal Public Domain Mark.

*Wikimedia Commons and Flickr Commons are the best sources for 'No Copyright' images.
